15. Charlene Baxter, Department for Technical Education	Reimbursement Procedures/Budget Information

12:00 Noon

Closing Remarks

Dr. Ahmed Sabie, State Director
Department for Technical Education

Kentucky Tech Prep Site Coordinator's Meeting A Message from State Director Dr. Ahmed Sabie

In our ever-changing world, what once was the exceptional is now the expected. What once was beyond comprehension is now the obtainable. What once was unimaginable is now the ordinary and this is the successful implementation of Tech Prep into Kentucky schools.

We have come to a point where academic and technical education has joined together to form a solid foundation for our educational system in meeting the workforce demands of our society. It is now more critical than ever to "work the plan" of Tech Prep and take it beyond simple comprehension and move it into reality. The Kentucky Tech Prep program helps prepare students to become equipped with the academic and technical skills required to solve problems in today's competitive workforce.

I hope the information made available to you at this year's conference will be invaluable as you reach to obtain increased accountability, program improvement and greater student achievement to make what once was unachievable into what is now realization.

The outcome of this conference was the result of many people investing in the Tech Prep concept and pushing forward so our students can utilize the program to realize their goals and objectives.
